

AMIT SHAH

Software Engineer | Backend Engineer

Ahmedabad, Gujarat | +91 9510876336 | shahamitsuresh@gmail.com | LinkedIn | GitHub | Portfolio

Solutions-driven Computer Science undergraduate with strong foundations in Data Structures & Algorithms, DBMS, Operating Systems, and Computer Networks. Experienced in designing secure REST APIs, scalable backend systems, and production-oriented web applications using Node.js, Express.js, PostgreSQL, and React. Passionate about clean architecture, maintainable software, and building reliable systems with modern software engineering practices.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering 2023 – 2027
Silver Oak College of Technology and Engineering, Silver Oak University | CGPA: 9.25 / 10

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL
Backend: Node.js, Express.js, REST APIs, JWT, Refresh Tokens, RBAC, bcrypt, Zod
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite
Databases & ORM: PostgreSQL, MongoDB, Prisma ORM, Mongoose
Tools & Cloud: Git, GitHub, Docker, Postman, AWS Cloud Foundations
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, CN

INTERNSHIP EXPERIENCE

Cloud Computing Intern | CodeAlpha Dec 2025 – Jan 2026

- Developed applications for data redundancy detection, SQL injection simulation, and a rule-based chatbot to strengthen understanding of secure coding and data integrity.
- Applied input validation, debugging, and structured problem-solving to build reliable and secure software solutions.

Data Analytics Intern | CSRBOX Jul 2025 – Aug 2025

- Processed, cleaned, and analyzed datasets using Pandas and NumPy to support data-driven decision-making.
- Created dashboards and reports to communicate insights to technical and non-technical audiences.

PROJECTS

NEXORA – Multi-Tenant AI-Powered CRM Platform
React.js | Node.js | Express.js | PostgreSQL | Prisma | JWT

- Designed and developed a multi-tenant CRM platform with secure authentication, role-based access control (RBAC), and RESTful APIs for managing organizations, users, leads, follow-ups, documents, and notifications.
- Implemented JWT authentication with refresh tokens, Prisma ORM, PostgreSQL, input validation using Zod, and tenant-level data isolation while building a scalable modular backend architecture.

DispatchIQ – Distributed Task Queue System
Node.js | Express.js | PostgreSQL | Prisma | Docker

- Built a distributed background job processing system with priority queues, automatic retries, worker registration, job scheduling, dead-letter queues, and real-time job status tracking.
- Implemented concurrent job processing using PostgreSQL row-level locking (FOR UPDATE SKIP LOCKED), worker heartbeat monitoring, retry mechanisms, and Docker-based local development.

CERTIFICATIONS

- AWS Academy Graduate — Cloud Architecting
- AWS Academy Graduate — Cloud Foundations
- NPTEL — Introduction to Internet of Things (Elite, Top 5%)
